

# Where We Are

---

*Wanakaset Sri Lanka* is located in the lush forest in Kitulgala by the bank of Kilani River

# What We Do

# What We Aspire

*To responsibly generate  
an ecologically-balanced  
as well as a harmonious  
environment... with the  
most possible varieties of  
living organisms within  
the 20 acres of land at  
Wanakaset Sri Lanka*

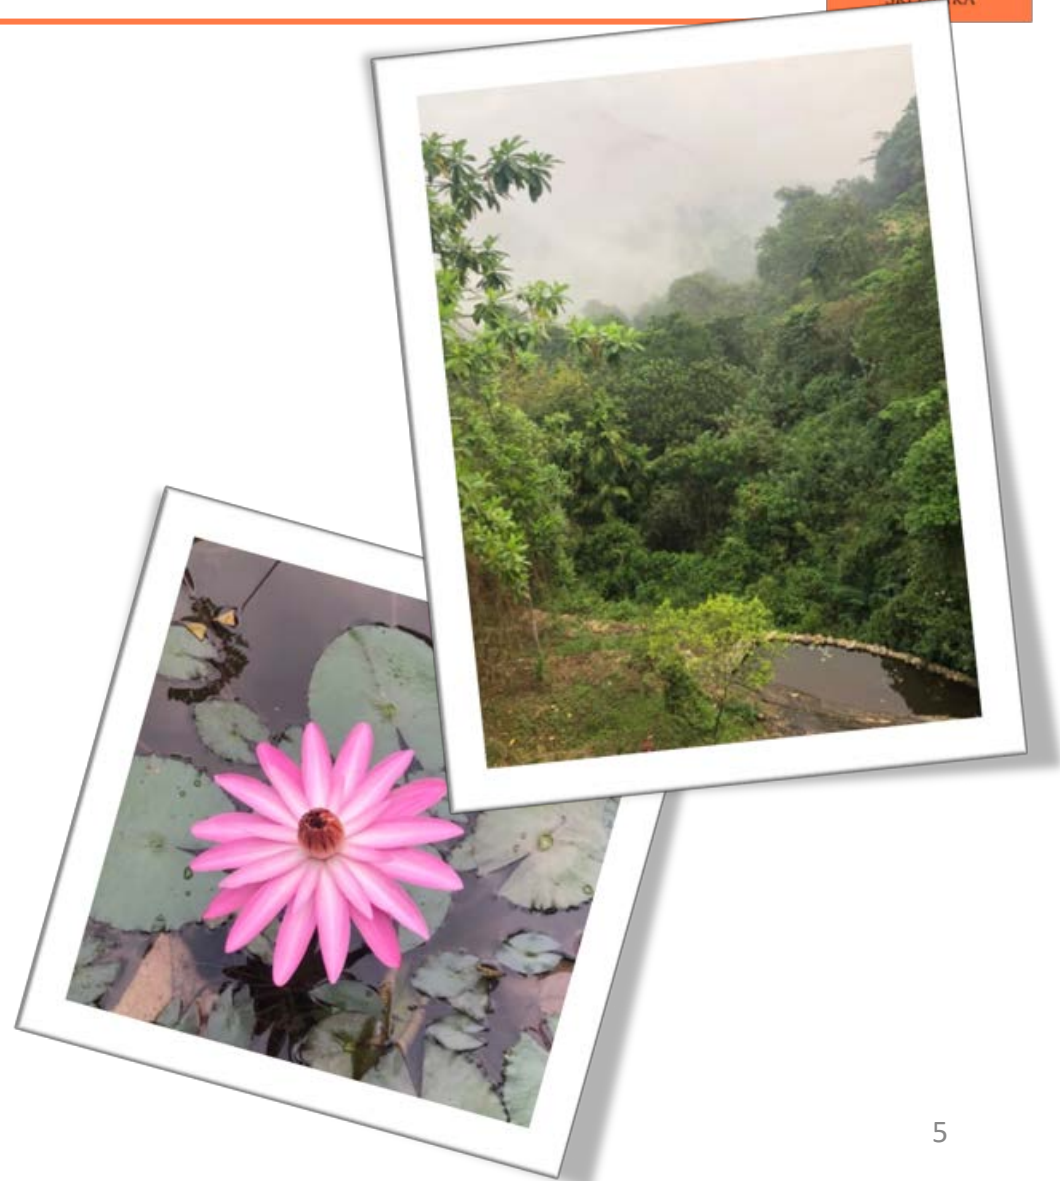

# What Guests Could Aspire

*Bring a sense of purpose  
to your holidays or time  
out of the office and join  
us in our efforts...*

*The only question is: what  
would be your legacy?  
Whatever it is, we will  
help look after it. A tree  
you plant or a vegetable  
or even an entire terrace.*

# A Truly Unique Experience

---

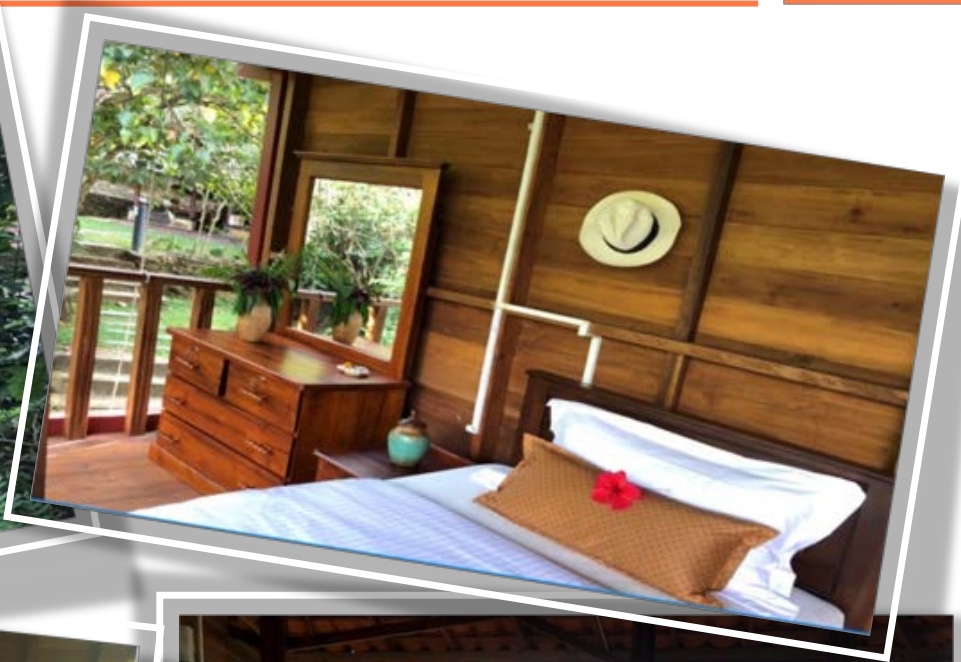

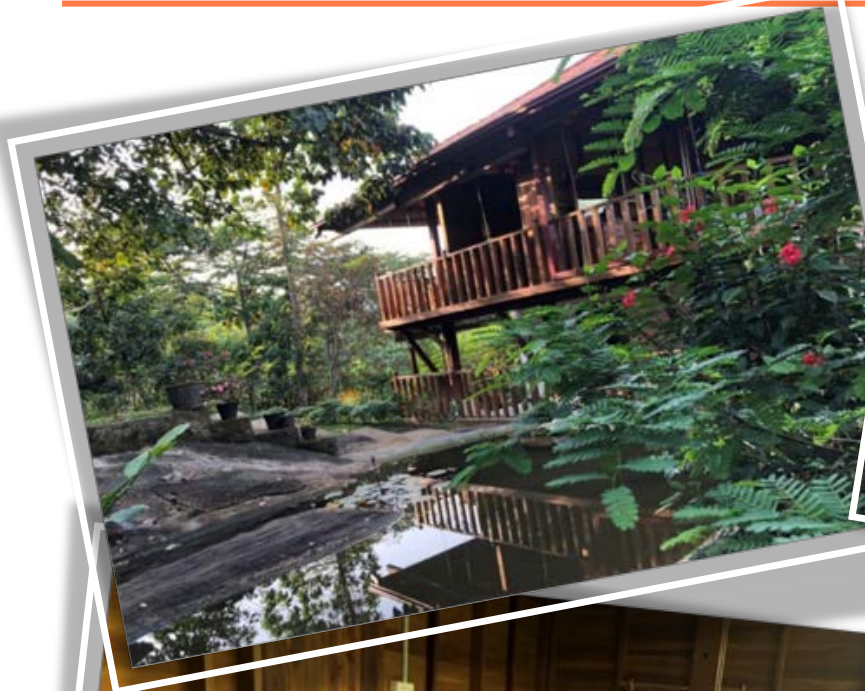

The one and only place in Kitulgala that offers a perfect blend of...

- ☞ A remarkable **Agro Forestry/Permaculture** project
- ☞ 20 acres of **forest** and diverse **fruit trees**
- ☞ Fascinating **wild life** viewing
- ☞ **sustainable** and self-sufficient ecosystem
- ☞ Breathtaking **views** and landscape
- ☞ Arrays of exciting **activities** for everyone in the family
- ☞ **comfortable** and delightful accommodation nestled in **the woods**
- ☞ Delectable Sri Lankan **cuisine** and more
- ☞ Unmatched **peace and serenity**

Visitors can relax or have fun while helping us plant trees and caring for the forest!

# Our Facility – Living Quarters

# Our Facility – The Main Hall

# Our Facility – Lounge & Dining Area

# Our Facility – Kitchen & Shower Area

# Our Facility – The Surroundings

# Suggested Activities

*For pleasure, experience and/or skill development and learning*

- ☞ Tree planting
- ☞ Tree nursing
- ☞ Terrace preparation
- ☞ Path maintenance and preparation
- ☞ Composting
- ☞ Natural soap making
- ☞ Kaffir lime shampoo making
- ☞ Natural building (Wattle and Daub with bamboo) – Will need prior notice
- ☞ Edible leaf trees/ perennial vegetables recognition
- ☞ Tea/Coffee/Spices harvesting

# Suggested Activities

*For pleasure, experience and/or skill development and learning*

---

- ☞ Fruit tree tour
- ☞ Harvesting
- ☞ Fishtail palm sugar production
- ☞ Agroforestry basic principles and design lecture
- ☞ Cooking with local ingredients
- ☞ Medicinal plants/herbs recognition
- ☞ Natural kitchen utensils making
- ☞ Yoga – Additional cost applies if a professional trainer is needed
- ☞ Ayurveda basic level
- ☞ White water rafting – Quotes as per Rafter's retreat website.
- ☞ Coconut leaves and bamboo leaves roofing

# Suggested Activities

For other purposes

## ☞ For fun experience/learning

- ☞ Bird watching \*
- ☞ Butterfly watching \*
- ☞ Hiking/Trekking
- ☞ Biking \*

## ☞ For beautiful experience and amazing scenery

- ☞ Adam's Peak visit – Quotes will be available upon request
- ☞ Jungle day trip

\* Complimentary with your own equipment; otherwise, quotes will be available upon specific request

# Suggested Activities

For other purposes

☞ For spiritual experience

☞ Meditation

☞ For team building \*

☞ Treasure hunting

☞ Natural house building challenge

☞ Utensil making

☞ For fun and relaxation

☞ River bathing

\* Needs planning and prior notice. Additional costs for raw material and safety equipment may apply.

# What to Expect (1 of 2)

We made a pledge to provide comfortable lodging for up to 15 people while minimizing our environmental impact to the lowest possible level.

## ☞ The Property and Amenities

- ☞ Buildings are made of **natural elements** like teak wood, bamboo, mud, and straw.
- ☞ All mattresses are made of natural latex.
- ☞ The lights in the garden are **solar lights** and during the rainy season, we provide members and guests with electric torches.
- ☞ **No air conditioning** on the property. Everything is cooked slowly, using **fire wood stoves** only, three times a day.
- ☞ Some electrical appliances are being used as it is more efficient for cold pressed vegetable or fruit juices and blending. A washing machine is available on site.
- ☞ We aim to avoid the use of plastic bottles and packaging and ask the same from our members and guests.
- ☞ Hot water is exclusively generated with **solar energy** (intermittent).
- ☞ A fridge is available for occasional use as no food is stored overnight.

# What to Expect (2 of 2)

## ☞ Water, Waste Management and Cleaning

- ☞ Water is collected from the rain and filtered but for those who are concerned, we can provide boiled water for drinking purposes as an additional precaution.
- ☞ We invested in a **micro dam** to capture **rain water** for irrigation and for a **hydro power** plant but then invested in a small diesel generator as keeping the water seemed more valuable.
- ☞ **Waste management** is another area where compromise is very difficult. In order to ensure waste water is collected and centralized, we had to organize the showers, toilets and urinals in a dedicated area away from the living area. However, to improve comfort, we built two toilets accessible from the ground floor of the members and guests rooms to be used exclusively at night and during heavy rain.
- ☞ **Cleaning** is probably the most polluting activity in terms of waste water, energy and detergents. We will only change linen every five nights for the same guests and encourage our members and guests to stay a minimum of two nights. We also try to only change the towels every three nights but acknowledge that sometimes every two nights is necessary.

The product of all of the above is that **Wanakaset is full of life**. Animals, birds, and insects feel at home but so do snakes, monkeys or deer. Nights can be noisy as the forest takes over its normal activity.
